

Achievers

Foundation course for your success

Workbook - 9

Class 5

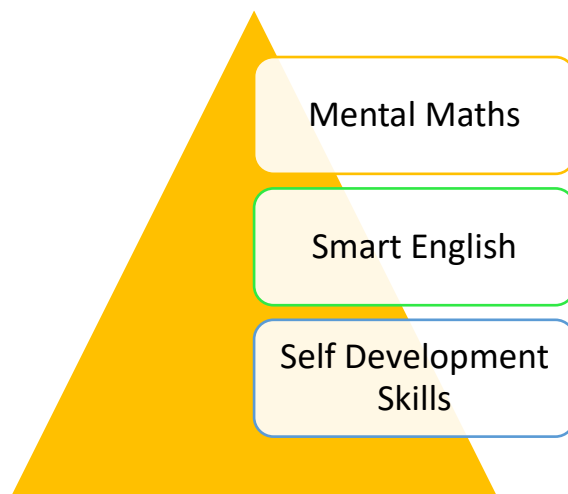

www.mentorsbasket.com

Preface

Most students and teachers think that the word "**Worksheet**" is a synonym for the word "*Boring*." We envision hours of sitting still at a desk-silent busy working for them and hours of grading for us. But worksheets still have a place in your classroom? In an age of open inquiry and problem-based learning, your child can still find power in a simple paper and pencil activity by practicing MENTORS BASKET WEEKLY worksheets.

Achievers Model bring to your child an opportunity to develop academically as well as for the competitive World. The Learning Process of every child is dependent on One's Ability to think logically and reason Quickly and effectively. These two factors are hence very crucial to a child's progress in education.

Mentors Basket Achievers weekly workbook covers Mental Math, Smart English, Enhance Self-Development Skills. These Powerful worksheets can help in building number sense, computational thinking, and problem-solving skills in your child at beginning of the foundational years. **Every Month we would be providing 3 Workbook and 1 Challenge Workbook, each of these are designed at different levels and standard wise. We would be providing upgraded workbooks, that makes the child to look forward to challenges. Weekly Workbook would be consisting of the following content:**

It is a unique way to provide differentiated brain-building work for different learners.

Strong Foundation Helps to Build Brighter Future

Design Framework

The Sample Workbook Consist of the topics as under:

- **Mental Maths** - We want our students to be able to understand content and concepts. We also want to stretch them to think and approach problems in new ways. This editable graphic organizer can help them do that! Challenge the students to solve a math problem more than one way. Have them explain how and why they solved it with their given strategy. Over time, we can see how mathematics can be transformed into a subject that is not only fun but also challenges students' creativity and independent thinking.
- **Smart English** - The study of English Language Arts, or speaking, listening, reading, and writing, is critical both to academic success and to life beyond school. Without the skills learned in language arts, students cannot achieve any kind of mastery in any of their coursework. Good communication skills are necessary for every career field, so these on-demand workbooks give your students the mixed review of grammar, spelling, and writing skills that will enable them to practice their language arts skills in a fun and diverting manner, ensuring that the skills they have learned will Supplement their language.
- **Self – Development** – Children who become invested in self-improvement at a young age will likely experience many advantages in life. But it can be a little tricky to figure out exactly how to go about teaching kids about self-improvement. We have developed strategies that can help children to be more confident and in becoming the best version of themselves.

GUIDELINES

1. Look at Problems with Different Perspectives Through Observation, Exploration and Critical Thinking.
2. Integrate the Application of Math to Problem Solving.
3. Integrate the Reading Skill in English To Solve Vocabulary or Spelling Questions.
4. Think Critically and Reason Logically
5. Practise, Investigate, Evaluate and Learn with Understanding
6. Develop Positive Attitude Towards Finding Solution
7. If Your No Able to Solve or Find Solution Seek for Help.
8. Take A Break and Revisit the Question with Fresh Thought
9. Ask Yourself How Many Questions You Could Answer in First Attempt.
10. Focus and Concentration Is the Only Key to Success

Smart English Worksheet 1

1. Read the passage and answer the questions below

A Forest Is a Food Factory

When you look at a forest, what do you see? You probably see many tall trees. You might also see pine cones on the ground or animals scurrying about. There's a lot more to a forest than meets the eye. A forest is actually a food factory! The plants in the forest are very busy making their own food. They do this through a process known as photosynthesis. Photosynthesis is a chemical reaction. It takes place in chlorophyll found in the leaves. Plants absorb water and nutrients from the soil. The leaves of the plants also take in carbon dioxide from the air.

Photosynthesis occurs when energy from the sun combines with the carbon dioxide and water. The result is glucose. Glucose is food for the plants. The process makes a waste product as well. The waste is oxygen. The plants must get rid of it. That's good news for people and animals! The plants might not need the oxygen, but we do! The next time you explore a forest, remember that the plants that surround you are not just a group of growing greenery. They are also a factory of hard workers, busily creating food for themselves and oxygen for you!

1. Why do you think the author calls the forest a "food factory"? Explain your answer.

2. *"The next time you explore a forest, remember that the plants that surround you are not just a group of growing greenery."* Which figurative language technique is being used in this quote from the passage?
- alliteration
 - simile
 - personification
 - onomatopoeia
3. Which of the following is an effect of photosynthesis?
- Oxygen is released.
 - Plants stop growing.
 - A physical change takes place.
 - People have water to drink.
4. The writer's main purpose for writing this story was to _____ her readers.
- entertain
 - express personal feelings to
 - persuade
 - inform

Smart English Worksheet 2

1. Read the passage and answer the questions below

A Brief History of Pizza

Pizza is popular. It's usually round but can be made into other shapes. It's often made with tomato sauce but can be made without. It often has melted cheese; it can be made with none. While often made for dinner, pizzas can also be made for breakfast or dessert.

Pizza may have begun as food for Italy's poor. They took flat bread and topped it with olive oil, tomatoes, and cheese. In 1889, a pizza was made that was fit for a king! It was made using items in the colors of the Italian flag. Tomatoes made red, the cheese was white, and fresh basil added some green. An Italian baker made this pizza for the king and queen of Italy. Pizza wasn't just for peasants anymore!

Italian immigrants brought pizza to America. This happened during the late 1800s. Pizza gained fans outside the Italian community after WWII. Soldiers had tasted it in Italy. They brought home a craving for more. In 1948, a boxed mix appeared in grocery stores. People could buy Roman pizza mix and make their own pizzas. Pizza restaurants sprang up across the land. Pizza delivery got its start in 1960. America's love for pizza continued to grow. Now there are even taco pizzas and barbecue pizzas!

On average, Americans eat 23 pounds of pizza per person each year. In October 2008, Joey Chestnut won \$5,000 in a pizza-eating contest. This 24-year-old man ate 45 slices in just 10 minutes! Pepperoni pizza is the pizza of choice for the average 10-year-old. What do you like on your pizza?

Questions

1. Which country's poor people may have eaten something a lot like pizza?
 - A. Austria
 - B. France
 - C. Italy
 - D. USA
2. In which year was pizza served to royalty?
 - A. 1889
 - B. 1905
 - C. 1960
 - D. 1948

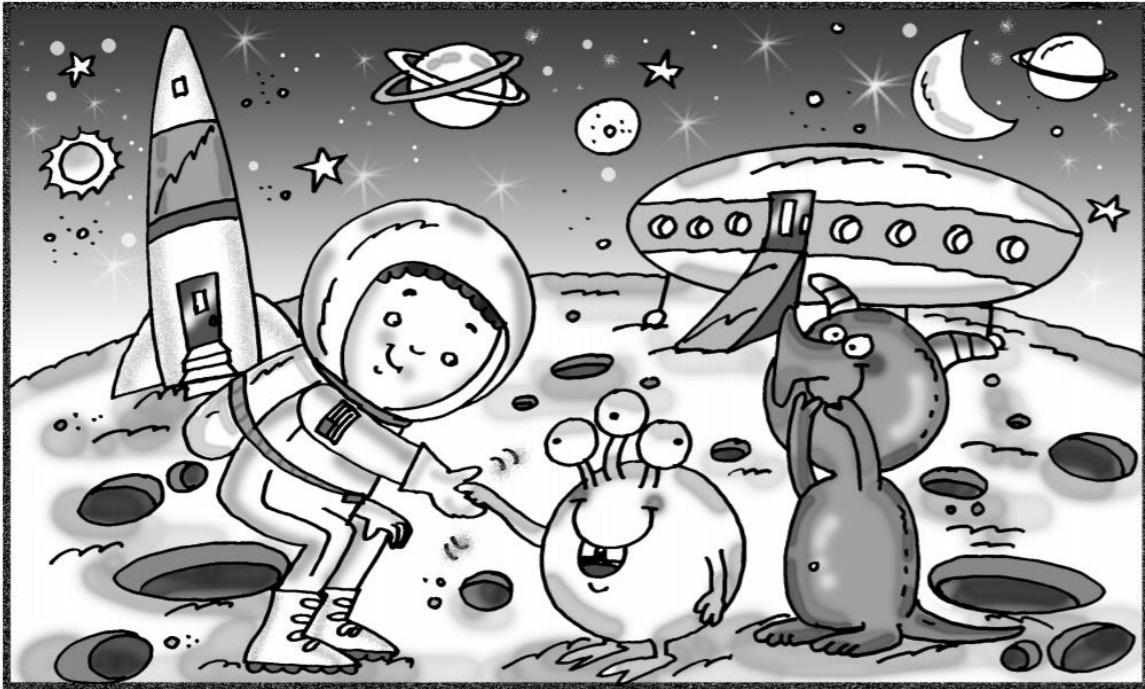

3. We can assume that before WWII _____.
- A. the only people who ate pizza were kings and queens
 - B. Americans ate 23 pounds of pizza apiece each year
 - C. most Americans had not sampled pizza
 - D. pizza tasted weird
4. In 1948, what could be found in grocery stores?
- A. All answers are correct.
 - B. frozen pizza
 - C. pizza mix
 - D. take-and-bake pizza
5. The colors of the Italian flag were mentioned in this article. Name them.
- _____
- _____
6. The favorite pizza of the average American kid is _____ pizza.
- A. mushroom
 - B. pepperoni
 - C. barbecue
 - D. cheese
