

Achievers

Foundation course for your success

Workbook - 2

Class 7

www.mentorsbasket.com

Preface

Most students and teachers think that the word "**Worksheet**" is a synonym for the word "*Boring.*" We envision hours of sitting still at a desk-silent busy working for them and hours of grading for us. But worksheets still have a place in your classroom? In an age of open inquiry and problem-based learning, your child can still find power in a simple paper and pencil activity by practicing MENTORS BASKET WEEKLY worksheets.

Achievers Model bring to your child an opportunity to develop academically as well as for the competitive World. The Learning Process of every child is dependent on One's Ability to think logically and reason Quickly and effectively. These two factors are hence very crucial to a child's progress in education.

Mentors Basket Achievers weekly workbook covers Mental Math, Smart English, Enhance Self-Development Skills. These Powerful worksheets can help in building number sense, computational thinking, and problem-solving skills in your child at beginning of the foundational years. **Every Month we would be providing 3 Workbook and 1 Challenge Workbook, each of these are designed at different levels and standard wise. We would be providing upgraded workbooks, that makes the child to look forward to challenges. Weekly Workbook would be consisting of the following content:**

It is a unique way to provide differentiated brain-building work for different learners.

Strong Foundation Helps to Build Brighter Future

Design Framework

The Sample Workbook Consist of the topics as under:

- **Mental Maths** - We want our students to be able to understand content and concepts. We also want to stretch them to think and approach problems in new ways. This editable graphic organizer can help them do that! Challenge the students to solve a math problem more than one way. Have them explain how and why they solved it with their given strategy. Over time, we can see how mathematics can be transformed into a subject that is not only fun but also challenges students' creativity and independent thinking.
- **Smart English** - The study of English Language Arts, or speaking, listening, reading, and writing, is critical both to academic success and to life beyond school. Without the skills learned in language arts, students cannot achieve any kind of mastery in any of their coursework. Good communication skills are necessary for every career field, so these on-demand workbooks give your students the mixed review of grammar, spelling, and writing skills that will enable them to practice their language arts skills in a fun and diverting manner, ensuring that the skills they have learned will Supplement their language.
- **Self – Development** – Children who become invested in self-improvement at a young age will likely experience many advantages in life. But it can be a little tricky to figure out exactly how to go about teaching kids about self-improvement. We have developed strategies that can help children to be more confident and in becoming the best version of themselves.

GUIDELINES

1. Look at Problems with Different Perspectives Through Observation, Exploration and Critical Thinking.
2. Integrate the Application of Math to Problem Solving.
3. Integrate the Reading Skill in English To Solve Vocabulary or Spelling Questions.
4. Think Critically and Reason Logically
5. Practise, Investigate, Evaluate and Learn with Understanding
6. Develop Positive Attitude Towards Finding Solution
7. If Your No Able to Solve or Find Solution Seek for Help.
8. Take A Break and Revisit the Question with Fresh Thought
9. Ask Yourself How Many Questions You Could Answer in First Attempt.
10. Focus and Concentration Is the Only Key to Success

Smart English Worksheet 1

1. Read the Passage and answer the questions.

Fossils: Clues to the Past

by Cindy Sherwood

Everybody knows that dinosaurs once roamed the earth. But how do we know that fact? Dinosaurs lived many millions of years ago and there were no photos taken of them (or any people around to take those photos!) Yet scientists do have proof of dinosaurs, thanks to fossils.

A fossil is what is left of an animal or a plant a long time after it dies. Fossils are the buried parts of living things that have been preserved from a different geological time period. You can think of fossils as the ancestors of today's animals and plants. To be considered a fossil, the remains must be at least 10,000 years old.

Usually when an animal or plant dies, it decomposes. That means it rots away to nothing over time. But sometimes, an animal gets buried at the bottom of an ocean in layers of sand or mud called sediment. Over many years, the animal's skeleton gets crushed by more layers of sediment. Eventually, the sediment hardens into rock over the bones, which decay. When that happens, minerals slowly replace the bones and make a cast of the skeleton in the same shape as the original. Millions of years later, the rock surrounding the skeleton surfaces after an earthquake or after erosion from wind and rain. The fossil is then just waiting to be found, perhaps by someone like you digging it up from the ground!

There are some other, more unusual ways for fossils to form. Scientists have discovered skeletons of animals that died instantly when a volcano erupted, their bones preserved in the ash. Small bugs or insects caught in tree sap can become fossils when

the sap hardens into a golden material called amber. And animals trapped in sticky natural asphalt or tar can turn into fossils. The most famous example of these fossils can be found right in the middle of California's biggest city, Los Angeles. Scientists have uncovered more than three million fossils from the

Ice Age at the La Brea Tar Pits, including saber-toothed cats and mammoths. And scientists there continue to dig up more fossils all the time!

Huge dinosaur skeletons are probably the most famous kinds of fossils. The largest ever found is a dinosaur called *sauroposeidon* (sore'-oh-puh-sie'-dun). Scientists think this type of dinosaur was 60 feet long and weighed 60 tons—that equals 120,000 pounds! But fossils are not always huge. The tiniest dinosaur fossil was found in China. *Microaptor* was only about a foot long, which is about the size of a box of cereal. Even tinier are the smallest fossils ever discovered, blue-green algae that lived on some rocks in Africa more than three billion years ago. Blue-green algae are also the very oldest fossils ever found.

Fossils give us a wonderful window into our past. Today the science of studying fossils is alive and well. *Paleontology* (pay-lee-un-tall'-uh-gee) is the study of the history of life on earth, using fossils as the evidence. So if you love dinosaurs and you want to know more about what happened on earth thousands or millions of years ago, maybe someday you can make your living by digging up fossils!

Fossils: Clues to the Past

by Cindy Sherwood

1. Which of the following statements is true about fossils?
 - a. The oldest fossils on record date back to the time of the first humans living in North America.
 - b. Only large animals, like dinosaurs, mammoths, and saber-toothed cats, are capable of becoming fossilized.
 - c. It is becoming harder and harder for scientists to find fossils, so paleontology is a dying profession.
 - d. You are likely to find a fossil after it has been brought to the surface by wind or rain erosion, or even a natural disaster.

2. According to the information in the article, why are fossils helpful in studying the prehistoric past?

3. Where are you most likely to discover a fossil?

- a. in North America, only b. in Asia, only
- c. all continents except Africa d. anywhere on earth

4. Using the information in the article, describe one way a fossil can form.

5. In your own words, describe what the La Brea Tar Pits are.

1. You have read the comprehension carefully already, with you understanding find out the vocabulary words.

Fossils: Clues to the Past

by Cindy Sherwood

The following terms are vocabulary words from the article. Match the vocabulary word with its correct definition by writing the corresponding letter on the line.

1. _____ mammoths	a. small, non-flowering plants that include seaweed and single-celled organisms
2. _____ sediment	b. an object that is made when material is shaped into a mold
3. _____ amber	c. maintained its original condition
4. _____ cast	d. the available information in support of a claim or proposition
5. _____ asphalt	e. material that settles at the bottom of a body of water
6. _____ algae	f. a framework of bones and cartilage supporting an animal's body
7. _____ erosion	g. ancient, extinct elephants from the time of the Ice Age
8. _____ evidence	h. a dark, sticky mixture; natural tar or pitch
9. _____ skeleton	i. the breakdown of rock or other material by wind, rain, or water
10. _____ preserved	j. a yellowish, see-through resin material that was produced by now-extinct trees in prehistoric times

Smart English Worksheet 3

- 1. Creative Writing:** Read the instructions carefully and explore your imagination to write the most appropriate information.

Fossils: Clues to the Past

by Cindy Sherwood

In the article, "Fossils: Clues to the Past," you learned that fossils help scientists learn about prehistoric animals, including dinosaurs and other extinct creatures, like mammoths and saber-toothed cats.

On the lines below, describe what kind of information scientists can learn about a prehistoric animal from studying its fossil. Base your answer on the information from the article and your knowledge of geology.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Smart English Worksheet 6

1. Read the instruction carefully and make sentences, an example has been done for you.

Cause & Effect

Read the cause and write an effect.

Then, write one full sentence that states the cause and effect.

example: **Cause:** A blizzard hit the city.

Effect: All the schools were closed.

Sentence: A blizzard hit the city, so all the schools were closed.

1. **Cause:** I planted some sunflower seeds.

Effect: _____

Sentence: _____

2. **Cause:** My sister stayed up past midnight.

Effect: _____

Sentence: _____

3. **Cause:** Lizzy spilled milk all over the floor.

Effect: _____

Sentence: _____

4. **Cause:** David signed up for guitar lessons.

Effect: _____

Sentence: _____

Mental Maths Worksheet 3

- 1. Let us try something different than the routine sums. Solve the following equations and quiz your brains. You can use the sequence chain method for solution steps.**

Jennie makes quilts. She can make 7 quilts with 21 yards of material. How many yards of material would be required to make 12 quilts?

Show your work and label your answer.

Brayden and Gavin were playing touch football against Cole and Freddy. Touchdowns were worth 7 points. Brayden and Gavin scored 7 touchdowns. Cole and Freddy's team scored 9 touchdowns. How many more points did Cole and Freddy have than Brayden and Gavin?

Show your work and label your answer.

On Thursday the Meat King Market sold 210 pounds of ground beef. On Friday they sold twice that amount. On Saturday they only sold 130 pounds. How much more meat did they sell on Friday than Saturday?

Show your work and label your answer.

Mental Maths Worksheet 5

1. Simple equations: Evaluate the following expression for X

Evaluate Expressions

Evaluate the following expressions for $x = 6$.

1. $7x$

2. $\frac{x}{3}$

3. $29 - x$

4. $\frac{36}{x}$

5. $9x$

6. $x + 41$

7. $3x + x$

8. $2x - 2$

Evaluate the following expressions for $b = 2$ and $c = 7$.

9. $5 + b + c$

10. $16 + b - c$

11. $c - b + 1$

12. $9b - c$

13. $7c - b$

14. $4c + b$

15. $12b + c$

16. $22 + b - c$

Evaluate the following expressions for $y = 8$ and $d = 4$.

17. $\frac{6y}{d}$

18. $\frac{20}{d} + y$

19. $\frac{yd}{2}$

20. $\frac{y}{d} + 6$

My Journal – Identifying Myself

Take 5 minutes to brainstorm all possibilities in your life

- What are you trying to achieve with your life?

- Which of your qualities are hindering you from achieving it?

- Are you ready to change or develop your personality?

- What character traits would you like to develop to achieve it?

- Why do you feel you need them?

- Where do you see yourself after successfully inculcating them?

- Will these help you contribute towards the betterment of the society?
