

Achievers

Foundation course for your success

Workbook - 5

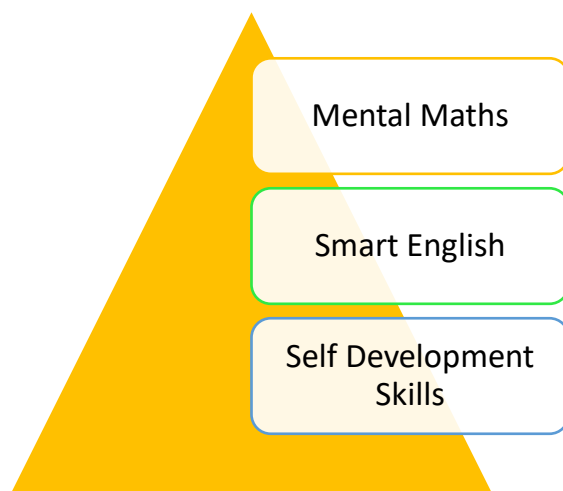

Class 7

Preface

Most students and teachers think that the word "**Worksheet**" is a synonym for the word "*Boring.*" We envision hours of sitting still at a desk-silent busy working for them and hours of grading for us. But worksheets still have a place in your classroom? In an age of open inquiry and problem-based learning, your child can still find power in a simple paper and pencil activity by practicing MENTORS BASKET WEEKLY worksheets.

Achievers Model bring to your child an opportunity to develop academically as well as for the competitive World. The Learning Process of every child is dependent on One's Ability to think logically and reason Quickly and effectively. These two factors are hence very crucial to a child's progress in education.

Mentors Basket Achievers weekly workbook covers Mental Math, Smart English, Enhance Self-Development Skills. These Powerful worksheets can help in building number sense, computational thinking, and problem-solving skills in your child at beginning of the foundational years. **Every Month we would be providing 3 Workbook and 1 Challenge Workbook, each of these are designed at different levels and standard wise. We would be providing upgraded workbooks, that makes the child to look forward to challenges. Weekly Workbook would be consisting of the following content:**

It is a unique way to provide differentiated brain-building work for different learners.

Strong Foundation Helps to Build Brighter Future

Design Framework

The Sample Workbook Consist of the topics as under:

- **Mental Maths** - We want our students to be able to understand content and concepts. We also want to stretch them to think and approach problems in new ways. This editable graphic organizer can help them do that! Challenge the students to solve a math problem more than one way. Have them explain how and why they solved it with their given strategy. Over time, we can see how mathematics can be transformed into a subject that is not only fun but also challenges students' creativity and independent thinking.
- **Smart English** - The study of English Language Arts, or speaking, listening, reading, and writing, is critical both to academic success and to life beyond school. Without the skills learned in language arts, students cannot achieve any kind of mastery in any of their coursework. Good communication skills are necessary for every career field, so these on-demand workbooks give your students the mixed review of grammar, spelling, and writing skills that will enable them to practice their language arts skills in a fun and diverting manner, ensuring that the skills they have learned will Supplement their language.
- **Self – Development** – Children who become invested in self-improvement at a young age will likely experience many advantages in life. But it can be a little tricky to figure out exactly how to go about teaching kids about self-improvement. We have developed strategies that can help children to be more confident and in becoming the best version of themselves.

GUIDELINES

1. Look at Problems with Different Perspectives Through Observation, Exploration and Critical Thinking.
2. Integrate the Application of Math to Problem Solving.
3. Integrate the Reading Skill in English To Solve Vocabulary or Spelling Questions.
4. Think Critically and Reason Logically
5. Practise, Investigate, Evaluate and Learn with Understanding
6. Develop Positive Attitude Towards Finding Solution
7. If Your No Able to Solve or Find Solution Seek for Help.
8. Take A Break and Revisit the Question with Fresh Thought
9. Ask Yourself How Many Questions You Could Answer in First Attempt.
10. Focus and Concentration Is the Only Key to Success

Smart English Worksheet 1

1. Read the Passage and answer the questions.

Wolves: True Wilderness Animals

By Guy Belleranti

Our tour bus rattles around a bend on the bumpy dirt road in Alaska's magnificent Denali National Park. Suddenly, we see wolves off to our left!

"The large black one is the alpha male," our guide says. "The one next to it is the alpha female."

Wolves are the largest members of the canidae family, but have you noticed how similar they look to domesticated dogs? It's because dogs are members of the canidae family too! Wolves and dogs are closely-related species. Wolves, however, are carnivores with jaws that are twice as strong as a dog's.

Wolves live in groups called packs. The pack has a hierarchy, or pecking order. The alpha male and female produce the offspring. They are in charge. When pups are born, they are sheltered in a burrow, cave, or other type of den. All pack members care for them. At six months of age, the pups begin joining in the hunt for prey. By two years they are fully mature.

The wolves use teamwork to hunt for food. Hunting in a pack helps wolves catch large animals like caribou, elk, and moose. When large prey isn't available, wolves will eat small animals like rabbits and mice.

Packs grow and change over time. Large, younger members move into alpha positions. Others leave to find a mate and start a new pack.

Like domesticated dogs, wolves communicate with their faces, body postures, various sounds, and scent markings. They communicate aggression by showing their teeth and growling. They indicate submission by rolling on their back.

Wolves' famous howls may sound sad, but they're often songs of celebration. Howls

can signal the beginning of a hunt, a successful hunt, or an end to a period of play. The howls also warn other packs to stay out of their territory.

Wolves have keen senses. They're also very strong, and they can run in short bursts of 40 miles an hour. They live in many climates and habitats, including hot deserts and the cold arctic tundra.

Gray wolves are the most common species of wolves. There are various subspecies of gray wolves, and their populations are widespread across North America. Wolves that live in the northern tundra and arctic sometimes weigh over 130 pounds. A second, smaller species, the red wolf, is a critically endangered species. Fewer than 150 remain in the wild.

Throughout history, people have had strong opinions about wolves. Some people revere them as symbols of the wilderness. Others despise them. When areas became populated with people, and farms and towns began to replace wilderness, wolves had fewer places to live and fewer animals to hunt. This meant wolves would sometimes attack people's sheep and cattle for food.

Governments around the world began paying hunters to kill wolves. In the United States, this continued for over 100 years until they were almost gone. Then, at last, the U.S. government made laws protecting them. Wolves were reintroduced into wild places and brought back into national parks like Yellowstone. Scientists learned that wolves create a balance between predator and prey. This balance creates healthier ecosystems for both plants and animals.

Wolves are wild animals, but there's no need to fear them. They want to avoid people and are true wilderness animals.

About the Author

Guy Belleranti is an author of fiction, poetry, articles, puzzles, and humor for children and adults. He also works as a docent at the Reid Park Zoo in Tucson, Arizona. The information in this article comes from his experiences teaching children about the wild animals at the zoo. Predators include tarantulas, centipedes, lizards, owls, bats, shrews and mice.

Wolves: True Wilderness Animals

By Guy Belleranti

- Based on the information you read in the article, which of the following choices best describes the alpha male and alpha female in a wolf pack?
 - The alpha pair do all the hunting for the pack.
 - The alpha pair produce the offspring and are in charge of the pack.
 - The alpha male and female are the most aggressive wolves in the pack.
 - The alpha male and female are the oldest wolves in the pack.
- Which of the following statements about wolves and domesticated dogs is NOT true?
 - Both wolves and dogs are members of the same family.
 - Both wolves and dogs use body language, facial expressions, sounds, and scents to communicate.
 - Wolves and dogs have the same amount of strength in their jaws.
 - Wolves and dogs look very similar to each other.
- Over the years, people have had strong opinions about wolves. Based on the information you read in the article, describe one reason someone might not like wolves.

- Which of the following statements best describes red wolf populations?
 - Red wolves are the most common species of wolves.
 - A red wolf can grow up to 130 pounds.
 - Red wolves can be found in the northern tundra regions.
 - Red wolves are a critically endangered species.
- What has the U.S. government done to help wolf populations since their decline?

- 1. Creative Writing:** Read the instructions carefully and explore your imagination to write the most appropriate information.

Wolves: True Wilderness Animals

By Guy Belleranti

In the article, "Wolves: True Wilderness Animals," you learned that wolves live in groups called packs. The wolves benefit from living in packs by using teamwork to hunt, taking turns watching over the pups, and providing one another with socialization, such as when they play together.

Choose another animal that lives in a group. Describe three benefits that animal receives from living in the group. If you use the Internet with a teacher or parent's permission, be sure to write the web address of the site you used to gather information at the bottom of this page.

Smart English Worksheet 4

1. **Spelling Counts!** In this exercise you will come across new words, add on to your knowledge by finding the meaning. Complete the task as instructed.

Using the Words Less & Fewer

Many people confuse the words less and fewer. Here's how you can tell which to use:

If you can count the items use the word fewer.

If the items are not countable, use the word less.

examples:

There are fewer oranges in the bowl, now that you have eaten some.

My glass has less orange juice than yours.

1. There were _____ rainy days this month than last month.
2. It took me _____ than an hour to complete my homework.
3. My little sister has _____ money in her piggy bank than I do.
4. The swimming pool has _____ water than it did last week.
5. There were _____ students absent from class today.
6. This bedroom has _____ space than we need.
7. This tomato plant has _____ tomatoes than that plant.
8. Nate weighs _____ than Joey.
9. A small car uses _____ gasoline than a large one.
10. Since I studied for my spelling test this week, I made _____ mistakes.

1. Unscramble the spelings to find the correct word. Have fun!

Spelling Words

List E-28: Demonyms

Spelling Words			Review
American	Asian	Welsh	galloping
Canadian	Australian	European	accidentally
Mexican	Chinese	Cuban	broccoli
Dutch	Japanese	Colombian	Challenge
British	Hispanic	Bolivian	Portuguese
Italian	French	Norwegian	Peruvian
African	German		

Answer the following questions about your spelling words.

- Which spelling word would describe a person from Wales? _____
- Name the spelling word that would describe a person from Italy. _____
- Which spelling word would describe a person from Colombia? _____
- Choose a spelling word that would describe a person from Cuba. _____

Write a spelling word for the given description.

- from or associated with the continent of Asia _____
- having to do with the country of Norway _____
- from or associated with the continent of Africa _____
- having to do with the the country Mexico _____

Match the description on the right to the spelling word on the left.

9. ____ If you were born in the Netherlands, you are	a. British
10. ____ If you are from a country in Europe, you are	b. Hispanic
11. ____ If you were born in England, you are	c. Dutch
12. ____ If you are from a country in Latin America, you are	d. European
