

Achievers

Foundation course for your success

Workbook - 10

Class 3

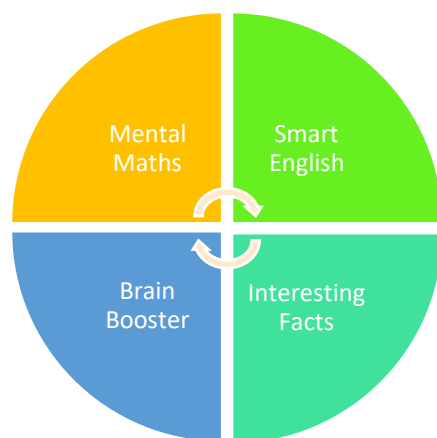

www.mentorsbasket.com

Preface

Most students and teachers think that the word "**Worksheet**" is a synonym for the word "*Boring.*" We envision hours of sitting still at a desk-silent busy working for them and hours of grading for us. But worksheets still have a place in your classroom? In an age of open inquiry and problem-based learning, your child can still find power in a simple paper and pencil activity by practicing MENTORS BASKET WEEKLY worksheets.

Achievers Model bring to your child an opportunity to develop academically as well as for the competitive World. The Learning Process of every child is dependent on One's Ability to think logically and reason Quickly and effectively. These two factors are hence very crucial to a child's progress in education.

Mentors Basket Achievers weekly workbook covers Mental Math, Smart English, Interesting Facts and Brain Boosters. These Powerful worksheets can help in building number sense, computational thinking, and problem-solving skills in your child at beginning of the foundational years. **Every Month we would be providing 3 Workbook and 1 Challenge Workbook, each of these are designed at different levels and standard wise. We would be providing upgraded workbooks, that makes the child to look forward to challenges. Weekly Workbook would be consisting of the following content:**

It is a unique way to provide differentiated brain-building work for different learners.

Strong Foundation Helps to Build Brighter Future

Design Framework

The Sample Workbook Consist of the topics as under:

- **Mental Maths** - We want our students to be able to understand content and concepts. We also want to stretch them to think and approach problems in new ways. This editable graphic organizer can help them do that! Challenge the students to solve a math problem more than one way. Have them explain how and why they solved it with their given strategy. Over time, we can see how mathematics can be transformed into a subject that is not only fun but also challenges students' creativity and independent thinking.
- **Smart English** - The study of English Language Arts, or speaking, listening, reading, and writing, is critical both to academic success and to life beyond school. Without the skills learned in language arts, students cannot achieve any kind of mastery in any of their coursework. Good communication skills are necessary for every career field, so these on-demand workbooks give your students the mixed review of grammar, spelling, and writing skills that will enable them to practice their language arts skills in a fun and diverting manner, ensuring that the skills they have learned will Supplement their language.
- **Brain Boosters** – The students need to be aware of what is happening Locally, Nationwide as well as Globally and what can be more challenging to the brains then answering some General Knowledge. We have designed worksheets that will give them an edge in competitive exams as they are more aware of the information.
- **Interesting Facts** - Academically we tend to focus more on the book knowledge, so now we want the child to be introduced to some interesting facts that can help them lead a discussion or lead in debates , competition and be a PRO kid. These interesting facts will increase their limited area of knowledge and make them more competitive and smarter.

GUIDELINES

1. Look at Problems with Different Perspectives Through Observation, Exploration and Critical Thinking.
2. Integrate the Application of Math to Problem Solving.
3. Integrate the Reading Skill in English To Solve Vocabulary or Spelling Questions.
4. Think Critically and Reason Logically
5. Practise, Investigate, Evaluate and Learn with Understanding
6. Develop Positive Attitude Towards Finding Solution
7. If Your No Able to Solve or Find Solution Seek for Help.
8. Take A Break and Revisit the Question with Fresh Thought
9. Ask Yourself How Many Questions You Could Answer in First Attempt.
10. Focus and Concentration Is the Only Key to Success

Smart English Worksheet 1**1. Circle the nouns in the sentence.**

Find the nouns and circle the **persons** in red, the **places** in blue and the **things** in black.

1. The actor won an award for his movie about Chicago.
2. The dog went swimming in the ocean.
3. Ice cream and cookies are the best dessert.
4. The pine trees in the forest are taller than most houses.
5. Stan wants to take a trip to the mountains.
6. I always wash my face before going to bed.
7. Zach collects model cars and boats.
8. My brother took a bus to the zoo to see the bears.
9. Grandpa lives in an igloo in Alaska.
10. The team does not practice volleyball in the summer.
11. Jenny rowed the boat across the pond to the clubhouse.
12. Parrots like to talk to people and eat crackers.

Smart English Worksheet 3

1. Read the Short comprehension and answer the question asked. Re-read for clarity.

Little Loon Learns a Lesson

The loon family made their nest near the edge of Lake Louise. Late that spring, their two eggs hatched, and the little loon chicks rode about on their mother's back for several days. When Mother loon was certain her babies were ready for a swimming lesson, each one was gently nudged from her back into the cool waters of the lake. The little chicks swam about by themselves in the water for the first time. It was hard for Mother loon to keep track of them. When one little chick swam left, the other one swam right.

One spring afternoon, the littlest chick swam around a large clump of bushes. Mother loon did not notice he was gone. Before he knew it, the little loon was lost. He swam around in the brown reeds until he spotted a beautiful whooping crane standing quite still at the water's edge. "Have you seen my mother?" asked the little loon. The crane had been standing motionless. "Go away," said the crane. "Can't you see I'm eating here? There's only room for one. Go away!" The little loon lowered his head and swam away.

A flock of mallard ducks startled the little loon as they landed on the lake to look for food. He swam behind some low tree limbs. The little loon peeked out at the ducks. Finally, he built up the courage to ask the ducks, "Have you seen my mother?"

"Wha-a-a-t? Wha-a-a-t?" quacked the ducks. "Wha-a-a-t do you want?" they quacked again. "I say, have you seen my mother?" repeated the little loon loudly. The ducks continued quacking, "Wha-a-a-t? Wha-a-a-t? Wha-a-a-t?" The little loon spoke slowly this time, "Have - you - seen - my - mother?" but the ducks were quacking so loudly that it was impossible to hear anything. Finally, the ducks swam off in a group leaving the little loon alone again. He kept trying and finally he heard his mother's call.

1. What do you think was the lesson the little loon learned?

- A. Never give up.
- B. Birds of a feather flock together.
- C. A bird in the hand is worth two in the bush.
- D. Don't count your chickens before they hatch.

2. Where were the baby loons sitting before they got their swimming lesson?

- A. The baby loons were sitting on the dock.
- B. The baby loons were sitting on the lakeshore.
- C. The baby loons were sitting on their father's back.
- D. The baby loons were sitting on their mother's back.

3. Why wouldn't the whooping crane help the little loon?

- A. The whooping crane was swimming.
- B. The whooping crane was deaf.
- C. The whooping crane was flying.
- D. The whooping crane was busy eating.

Mental Maths Worksheet 2

1. Let's try something different than the routine sums. Solve the following flash card and quiz your brains.

"Hannah likes to watch the tube way too much," says Dad.

"It's YouTube, Dad," interrupts Hannah. "And I only do the family rule -- I only watch YouTube on my computer for 3 times as long as it takes to do my homework."

"You sure?" asked Dad. "You did your homework in only 5 minutes, and then I'm pretty sure you watched your computer for 30 minutes."

If Hannah didn't want to break the family rule, but she did still want to watch her computer for 30 minutes, how long should she have spent on her homework?

Show your work.

Did you know these Interesting Facts! – **FOOD FACT**

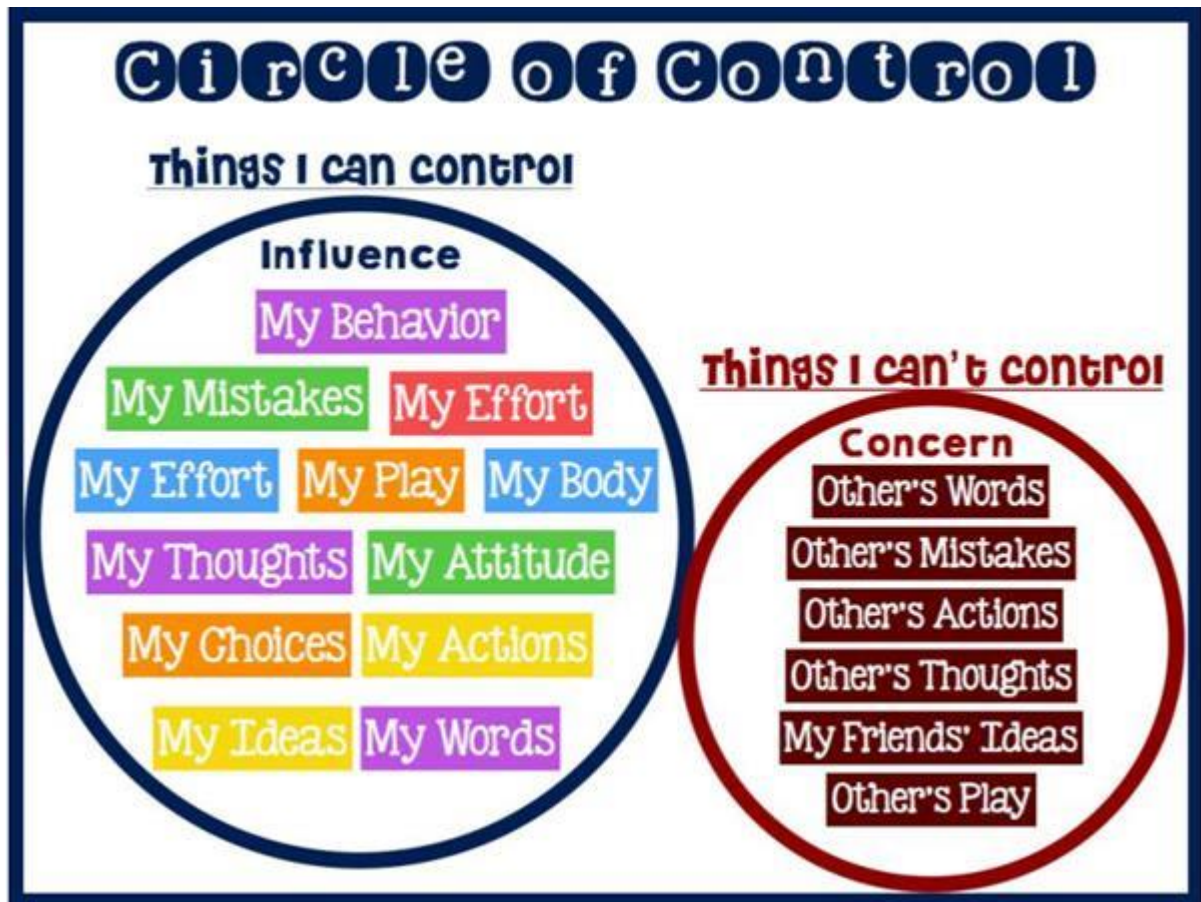

WAYS TO AVOID WASTAGE OF FOOD

If excess food is cooked, then it gets wasted. Leftover food is thrown as waste.

Some people spill the food while eating and some waste the food without eating completely. Food grains like rice, wheat, pulses like grams and oilseeds like ground nut are attacked by insects and fungi, causing decay and damage to them. Hence to avoid this, neem leaves are placed in the storage bags and huge bins. Rats also spoil the stored food grains. Ants make the sugar and jaggery unusable.

		Cook required quantity of food.
		Use fruits and vegetables wastes as organic manure
		Some vegetables and fruits peel can be used for aroma therapy and as cleaning agents.
		Excess food can be distributed to the needy
		Leftover food can be used to make new dish
		Buy only what you need
