

Achievers

Foundation course for your success

Workbook - 3

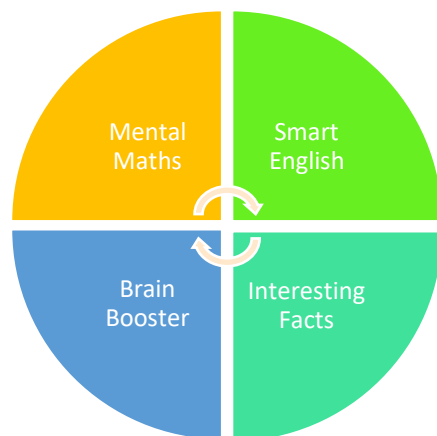

Class 3

Preface

Most students and teachers think that the word "**Worksheet**" is a synonym for the word "*Boring.*" We envision hours of sitting still at a desk-silent busy working for them and hours of grading for us. But worksheets still have a place in your classroom? In an age of open inquiry and problem-based learning, your child can still find power in a simple paper and pencil activity by practicing MENTORS BASKET WEEKLY worksheets.

Achievers Model bring to your child an opportunity to develop academically as well as for the competitive World. The Learning Process of every child is dependent on One's Ability to think logically and reason Quickly and effectively. These two factors are hence very crucial to a child's progress in education.

Mentors Basket Achievers weekly workbook covers Mental Math, Smart English, Interesting Facts and Brain Boosters. These Powerful worksheets can help in building number sense, computational thinking, and problem-solving skills in your child at beginning of the foundational years. **Every Month we would be providing 3 Workbook and 1 Challenge Workbook, each of these are designed at different levels and standard wise. We would be providing upgraded workbooks, that makes the child to look forward to challenges. Weekly Workbook would be consisting of the following content:**

It is a unique way to provide differentiated brain-building work for different learners.

Strong Foundation Helps to Build Brighter Future

Design Framework

The Sample Workbook Consist of the topics as under:

- **Mental Maths** - We want our students to be able to understand content and concepts. We also want to stretch them to think and approach problems in new ways. This editable graphic organizer can help them do that! Challenge the students to solve a math problem more than one way. Have them explain how and why they solved it with their given strategy. Over time, we can see how mathematics can be transformed into a subject that is not only fun but also challenges students' creativity and independent thinking.
- **Smart English** - The study of English Language Arts, or speaking, listening, reading, and writing, is critical both to academic success and to life beyond school. Without the skills learned in language arts, students cannot achieve any kind of mastery in any of their coursework. Good communication skills are necessary for every career field, so these on-demand workbooks give your students the mixed review of grammar, spelling, and writing skills that will enable them to practice their language arts skills in a fun and diverting manner, ensuring that the skills they have learned will Supplement their language.
- **Brain Boosters** – The students need to be aware of what is happening Locally, Nationwide as well as Globally and what can be more challenging to the brains then answering some General Knowledge. We have designed worksheets that will give them an edge in competitive exams as they are more aware of the information.
- **Interesting Facts** - Academically we tend to focus more on the book knowledge, so now we want the child to be introduced to some interesting facts that can help them lead a discussion or lead in debates , competition and be a PRO kid. These interesting facts will increase their limited area of knowledge and make them more competitive and smarter.

GUIDELINES

1. Look at Problems with Different Perspectives Through Observation, Exploration and Critical Thinking.
2. Integrate the Application of Math to Problem Solving.
3. Integrate the Reading Skill in English To Solve Vocabulary or Spelling Questions.
4. Think Critically and Reason Logically
5. Practise, Investigate, Evaluate and Learn with Understanding
6. Develop Positive Attitude Towards Finding Solution
7. If Your No Able to Solve or Find Solution Seek for Help.
8. Take A Break and Revisit the Question with Fresh Thought
9. Ask Yourself How Many Questions You Could Answer in First Attempt.
10. Focus and Concentration Is the Only Key to Success

Smart English Worksheet 1

Reflexive pronouns-
Grade Two Common Core L.2.1.C

Monsters often keep to themselves/ourselves because they are actually quite shy.

They often say to one another, "If we keep to themselves/ourselves, no one will make us take baths!"

Prim is an unusual monster and likes to keep itself/herself clean, so she takes a bubble bath once a year.

If a swamp with monsters in it could say something to itself/himself, what would it say?

I often think to myself/ourself that monsters might be fun friends.

Have you ever wondered to ourselves/yourself whether monsters are real?

Grim often thinks to himself/themselves that he should be a little more cheerful.

Here are some common reflexive pronouns, which are extremely fun words: myself, yourself, himself, herself, itself, ourselves, and themselves. Aren't those just the best words ever?! OK, well maybe not, but please help these monsters by circling the correct reflexive pronouns in the following sentences.

Draw a picture of a shy monster here if you like:

Draw a picture of a monster in a bubble bath here if you like:

Draw a picture of a cheerful monster face here if you like:

Smart English Worksheet 3

1. Read the Short comprehension and answer the question asked. Re-read for clarity.

Those Mighty, Mighty Ants!

Ants are amazing insects. They live in colonies. Each colony is a system of ants that work together and depend on one another in order to live. Each colony has worker ants, soldier ants, and one or two queen ants. They do different jobs. Each job is important. The colony would not do very well if a job did not get done. Every ant does its part. The worker ants must move the quickest. The worker ants are responsible for many jobs. Worker ants do not live very long. They collect food for the colony, they look after the queen's eggs, and they work hard to keep the nest and tunnels clean. If there are no soldier ants nearby, worker ants also protect the nest.

The nest may be made underground, beneath rocks, or inside old trees. It is common to see mounds of dirt, or ant hills, on the ground. These ant hills surround an entrance to the nest. As the ants tunnel through the ground or other material, some must be removed. The material is carried out of the tunnels and placed outside the entrance. This forms an ant hill.

Like other insects, ants have six legs. Ants use their strong legs to help them move quickly around the nest. Ants also have three main body parts. They are called the head, thorax, and abdomen. These three body parts allow ants to carry large amounts of weight. Ants can lift twenty times their body weight. For example, if your body weighs fifty pounds, you would be able to lift one thousand pounds all by yourself. That requires a lot of strength. Ants also have two stomachs. They have an extra stomach to store food for the other members of the colony.

The next time you see an ant on the sidewalk or climbing around on a leaf, remember that the little ant is doing its very important job. When all the ants do their special jobs, they create something wonderful: an ant colony complete with a nursery for larvae (baby ants), a dump where they put their waste, and even a kitchen where they store all their food. Ants may be tiny, but they are mighty!

1. Ants live and work together in a group called a ____.	2. You weigh seventy pounds. How much weight could you lift if you were an ant? A. 14 lbs. B. 1,400 lbs. C. 7,014 lbs. D. 70 lbs.
3. How many more stomachs do ants have than humans? A. three B. one C. two D. four	4. Baby ants are called _____. A. queens B. annettes C. worker ants D. larvae

Did you know these Interesting Facts! - Fun Bat Facts

For centuries, bats have been called sinister and spooky, likely because of their beady eyes and razor-sharp fangs. But there is more to these nocturnal creatures than meets the eyes. There are more than 1,300 species of bats in the world, making them the second most common group of mammals after rodents. Some weigh less than a penny, while others have a wingspan of six feet,

but all are impressive and vital members of their ecosystems:

Some interesting facts share it with your friends and have fun!

- Bats are flying mammals.
- While others can glide, bats are the only mammals capable of continued flight.
- There are over **1000** different bat species.
- Bats are nocturnal (**active at night**).
- Bats 'see' in the dark using a special skill called **echolocation**. Bats make noises and wait for the sound waves to bounce back off objects (an echo), if it does not bounce back then they can safely fly forward. They can tell the distance of various objects by how quickly the sound waves bounce back to them.
- Most bats feed on insects, while others eat fruit, fish or even blood!
- There are **3 species of vampire bats** which feed solely on blood.
- Vampire bats have small and extremely sharp teeth which are capable of piercing an animal's skin (humans included) without them even noticing.
- Vampire bats can carry rabies, making their bites potentially dangerous.
- Some bats live by themselves while others live in caves with thousands of other bats.
- Bats can live for over **20 years**.

My Journal – We can Show Respect – What's your style!

We can show

respect!

we can show respect to our friends by:

sharing
taking turns
keeping our hands to ourselves

using teamwork
using kind words
being helpful

loving each other

we can show respect to our parents by:

loving them
listening to them
being honest

using words like please and thank you

we can show respect to our teachers by:

Raising our hands
using kind words

listening and following directions

being honest
being helpful
using words like please and thank you

we can show respect to our school by:

picking up trash (even when it's not ours!)
cleaning up our mess

treasuring books
not being wasteful

I can show respect to myself by:

being on time
being prepared
being neat and clean

always doing my best

How do you show respect to your Grandparents

How do you show respect to your Neighbors.

How do you show respect to your Relatives.

How do you show respect to your siblings.
