

Achievers

Foundation course for your success

Workbook - 5

Class 4

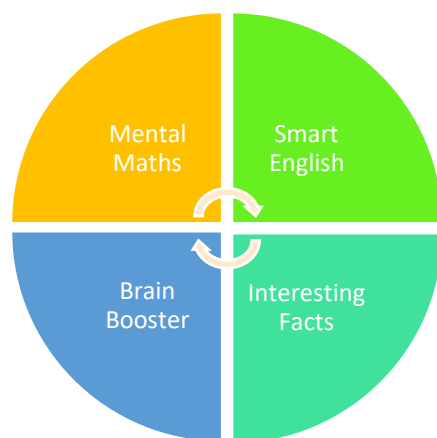

www.mentorsbasket.com

Preface

Most students and teachers think that the word "**Worksheet**" is a synonym for the word "*Boring.*" We envision hours of sitting still at a desk-silent busy working for them and hours of grading for us. But worksheets still have a place in your classroom? In an age of open inquiry and problem-based learning, your child can still find power in a simple paper and pencil activity by practicing MENTORSBASKET WEEKLY worksheets.

Achievers Model bring to your child an opportunity to develop academically as well as for the competitive World. The Learning Process of every child is dependent on One's Ability to think logically and reason Quickly and effectively. These two factors are hence very crucial to a child's progress in education.

Mentors Basket Achievers weekly workbook covers Mental Math, Smart English, Interesting Facts and Brain Boosters. These Powerful worksheets can help in building number sense, computational thinking, and problem-solving skills in your child at beginning of the foundational years. **Every Month we would be providing 3 Workbook and 1 Challenge Workbook, each of these are designed at different levels and standard wise. We would be providing upgraded workbooks, that makes the child to look forward to challenges. Weekly Workbook would be consisting of the following content:**

It is a unique way to provide differentiated brain-building work for different learners.

Strong Foundation Helps to Build Brighter Future

Design Framework

The Sample Workbook Consist of the topics as under:

- **Mental Maths** - We want our students to be able to understand content and concepts. We also want to stretch them to think and approach problems in new ways. This editable graphic organizer can help them do that! Challenge the students to solve a math problem more than one way. Have them explain how and why they solved it with their given strategy. Over time, we can see how mathematics can be transformed into a subject that is not only fun but also challenges students' creativity and independent thinking.
- **Smart English** - The study of English Language Arts, or speaking, listening, reading, and writing, is critical both to academic success and to life beyond school. Without the skills learned in language arts, students cannot achieve any kind of mastery in any of their coursework. Good communication skills are necessary for every career field, so these on-demand workbooks give your students the mixed review of grammar, spelling, and writing skills that will enable them to practice their language arts skills in a fun and diverting manner, ensuring that the skills they have learned will Supplement their language.
- **Brain Boosters** – The students need to be aware of what is happening Locally, Nationwide as well as Globally and what can be more challenging to the brains then answering some General Knowledge. We have designed worksheets that will give them an edge in competitive exams as they are more aware of the information.
- **Interesting Facts** - Academically we tend to focus more on the book knowledge, so now we want the child to be introduced to some interesting facts that can help them lead a discussion or lead in debates , competition and be a PRO kid. These interesting facts will increase their limited area of knowledge and make them more competitive and smarter.

13.	Interesting Fact- Food and Digestion	18 - 19
14.	My Journal – Art of Friendship	20

GUIDELINES

1. Look at Problems with Different Perspectives Through Observation, Exploration and Critical Thinking.
2. Integrate the Application of Math to Problem Solving.
3. Integrate the Reading Skill in English To Solve Vocabulary or Spelling Questions.
4. Think Critically and Reason Logically
5. Practise, Investigate, Evaluate and Learn with Understanding
6. Develop Positive Attitude Towards Finding Solution
7. If Your No Able to Solve or Find Solution Seek for Help.
8. Take A Break and Revisit the Question with Fresh Thought
9. Ask Yourself How Many Questions You Could Answer in First Attempt.
10. Focus and Concentration Is the Only Key to Success

Smart English Worksheet 1

1. Learn about relative pronoun and solve the given exercises.

Definition

A relative pronoun is used to connect a clause or phrase to a noun or pronoun. The five you will be focusing on are who, whose, whom, which, and that.

Example

The car that my grandpa drives is the same one he has driven for decades. Notice that "that" is used to introduce a clause.

Practice

Circle the relative pronoun in the sentence.

1. I forgot my homework today, which was a big mistake.
2. I have an aunt whose children are all much older than I.
3. Students who study hard can almost always pass their classes.
4. The lady to whom I waved is my sister.
5. I finally listened to the song that everyone is talking about!

Smart English Worksheet 3

Here is a story about Maria, Jeffrey, Devon and Karen. They need to make some decisions, but they all are confused. How will they make decisions? Let us find out. After reading this story answer the questions given below.

How Do I Make a Great Decision?

By Jennifer Kenny

Maria was the new kid on the block. She had just entered this high school and was trying to make some friends. She was excited when a popular girl named Susie invited her to go to the mall. The catch was that Susie was skipping class to go have fun. What should Maria do?

Jeffrey was hanging out with his buddies on a Friday night. He was having a great time until a friend's older brother brought over some beer. Jeffrey is only 17. What should Jeffrey do?

Devon went to the movies with a new group of kids from school. After the movie, the kids started pressuring him to smoke cigarettes with them. What should Devon do?

Karen is so hungry! She stops for a quick bite to eat for lunch. She's been trying to eat nutritious meals, but now she is very tempted. She really wants the cheeseburger, but there is a salad available. What should Karen do?

You make **decisions** like these all the time. Some of them are small, and some of them are big. Some of them are easy, and some of them are more difficult. All decisions have **consequences**, or results. Consequences can be positive or negative, so it is important to think your decisions through. Choosing not to smoke a cigarette can lead to a positive consequence - healthy lungs. Choosing to continually eat the burgers instead of the salads can lead to weight gain and heart disease.

Consequences of your decisions can affect yourself. Consequences of your decisions can affect others, too. How? Think about it. Your decision to smoke creates secondhand smoke for those around you. Drinking while driving can harm innocent people. Choosing to recycle helps everyone around you.

When making big decisions, it is important to not be impulsive. You want to do your best not to regret anything later. Give some thought to your situation. Review your options. Think about all your choices. Not many things are black and white. You might have more choices than you realize.

Your choices or answers to the problem have consequences. Some might be short-term. For example, if Devon says yes to the cigarette, he might feel sick. If he says no, he might feel embarrassed or pressured. The long-term consequences exist as well, though. If Devon chooses to smoke, he will put himself in a situation where others will consider him a smoker. If he becomes addicted, there will be serious health consequences.

After thinking over the pros and cons of all your choices, choose the best one. Make the choice that reflects who you are and what your values are. Respect yourself.

After your decision is made, think it over. How did your decision make you feel? When Devon said no to the cigarette, he felt relief. He didn't feel the pressure he thought he would after he clearly said no. He felt good about himself because he had made a healthy decision for his body. He was also glad that his parents would feel proud of him!

You may face situations in life where you feel completely unsure what to do by yourself. These, ironically, are sometimes the really big problems with tough choices. That feeling of uncertainty is normal and natural. What is a person to do? Get some advice. Find someone who you can talk to that understands you - a friend, a parent, or a teacher. Sometimes when you are uncertain, you can't see things clearly. Someone else might. These individuals can also support you. Collaborating, or working together with others, can also be helpful - if not essential. Learning how to collaborate now will help you make great decisions.

If you happen to make a poor decision, you are not alone. **EVERYONE MAKES MISTAKES**. First, admit it and take responsibility. Then think about and try to correct it. Learn from your mistakes.

Take your time. Make the best decision for you!

- _____ 1. Which word means a result of your decision?
- A. humiliation
 - B. consequence
 - C. mistake
 - D. collaboration
- _____ 2. Which word means working together with others?
- A. collaborating
 - B. consequence
 - C. thought
 - D. assessment
- _____ 3. Decisions can have short-term and long-term consequences.
- A. true
 - B. false
- _____ 4. Decisions should reflect your value system.
- A. false
 - B. true
- _____ 5. Which is NOT a good idea when making a decision?
- A. Choose the best choice.
 - B. Give thought to your choices.
 - C. Reflect on your decision.
 - D. Be impulsive.
- _____ 6. Everyone makes mistakes.
- A. true
 - B. false

Mental Maths Worksheet 1

1. What relation do the following set of numbers share? Observe, understand, and answer.

Find the missing numbers. These both have the same rule. What is the rule?

If

$$1, 7 = 8$$

$$2, 12 = 14$$

$$3, 16 = 19$$

$$4, 20 = 24$$

Then

$$5, 23 = ?$$

If

$$8, 12 = 20$$

$$9, 14 = 23$$

$$10, 19 = 29$$

$$11, 22 = 33$$

Then

$$12, 24 = ?$$

Find the missing numbers. These both have the same rule. What is the rule?

If

$$1, 8 = 9$$

$$2, 10 = 12$$

$$3, 12 = 15$$

$$4, 17 = 21$$

Then

$$5, 20 = ?$$

If

$$3, 12 = 15$$

$$4, 16 = 20$$

$$5, 20 = 25$$

$$6, 22 = 28$$

Then

$$7, 26 = ?$$

1. Dr. Programmer loves to type on his computer. But his dam monitor is sometimes broken. Fill in what the computer should print.

Dr. Programmer typed:

```
tens = 3
ones = 7
print ("My number is ",tens,ones)
```

The computer replied:

My number is 37

```
tens = 4
ones = 6
print ("My number is ",tens,ones)
```

```
tens = 6
ones = 8
print ("My number is ",tens,ones)
```

```
tens = 1
ones = 3
print ("My number is ",tens,ones)
```

```
ones = 3
tens = 8
hundreds = 4
print ("My number is ",hundreds,tens,ones)
```

```
ones = 6
tens = 8
hundreds = 6
print ("My number is ",hundreds,tens,ones)
```

```
ones = 6
tens = 7
hundreds = 6
print ("My number is ",hundreds,tens,ones)
```

```
tens = 3
print (tens," tens is ",tens,'0')
```

3 tens is 30

```
tens = 6
print (tens," tens is ",tens,'0')
```

```
tens = 7
print (tens," tens is ",tens,'0')
```

```
tens = 32
print (tens," tens is ",tens,'0')
```

32 tens is 320

```
tens = 86
print (tens," tens is ",tens,'0')
```

Did you know these Interesting Facts! – EARTH AND UNIVERSE

	MERCURY • Mercury has large variations in its temperatures during day and night. • Mercury does not have any satellite of its own. • There is no water or atmosphere on Mercury. • 88 days on Mercury makes a year as it takes Mercury 88 days to orbit around the sun, hence Mercury has the shortest year among all planets. • Mercury can be seen with naked eyes. • No seasons exists on Mercury's surface.
	VENUS • Venus orbits around the sun once in about 225 earth days. • Venus doesn't have any oceans. Its atmosphere is made up mostly of carbon dioxide. There are almost no water vapors in its air. • Venus is totally covered by clouds, this is why it is also known as a Veiled planet. • There are many volcanoes on Venus. These volcanoes are not active anymore, which means they do not erupt. • Venus is covered by thick clouds, therefore it reflects a lot of sunlight making it the brightest planet. • It is the hottest planet in our solar system. • Venus reaches its maximum brightness shortly before sunrise or shortly after sunset, so it is also known as either the Morningstar or the Evening star. • It has the slowest rotation in the solar system.
	EARTH • It is the largest of the four inner planets. Earth is often called the Water Planet because of the presence of water on it. It is the only planet in our solar system that has liquid water on its surface. • About 71% of the earth's surface is covered by water. It reflects about 1/3rd of sunlight that it receives. • Earth is called the blue planet because from space the oceans combined with the atmosphere makes the planet look blue. • The layer of gases remains attached to the ground of the planet due to gravity which prevents too much heat or UV rays from the Sun reaching the earth. • Moon is the only satellite of the earth. It revolves around the sun and due to its tilt, seasons are created. • It rotates about its own axis, thus creating day and night. It takes 24 hours to make one rotation.

WHAT IS EARTH MADE UP OF?

CRUST

The Layer of hard rocks cover the earth. This called the Earth's Crust.

The Crust is the outer layer.

5-100 km thick.

2 types of Crust

OCEANIC (very dense, made of granite)

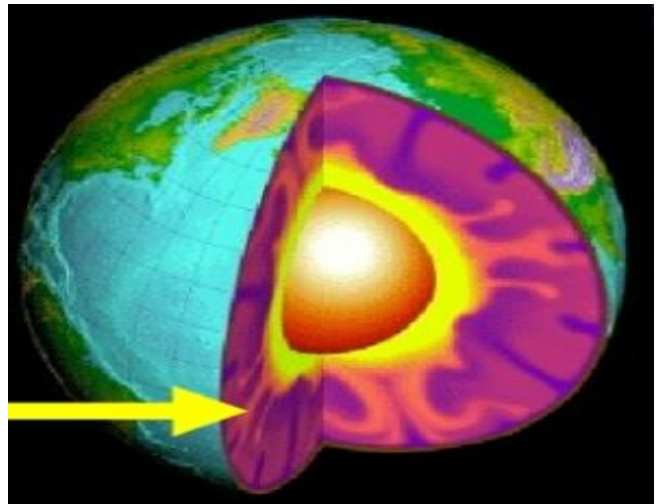

CONTINENTAL (less dense, made of granite.)

a. THE MANTLE

- Mantle is the middle layer.
- Mantle is a very thick layer
- Mantle is a mixture of Rocks and Metal.

b. THE CORE

- Made mostly of iron.
- 1/3 of the Earth's mass.
- The core is extremely hot.
- The core is the centre of the earth.
- It is extremely hot and due to extreme heat; nothing here can remain in as solid form and there are metals in molten form.

WHY ARE EARTHS LAYERS SIIMILAR TO AN EGG?

- SHELL: CRUST
- EGG WHITE: MANTLE
- YOLK: CORE

My Journal – Art of Friendship

What are the qualities of a good friend and a bad friend?

Write about it in the box given below:

My Best Friends Name Them
